

# KOLA TEJA

Associate Software Developer

## PROFILE SUMMARY

Full Stack JavaScript Developer with 1 year and 3 months of experience in building scalable web applications. I've worked on 5+ projects using modern technologies across both frontend and backend. Skilled in React.js, TypeScript, Ant Design, HTML, and CSS for building responsive UIs. On the backend, I use Node.js and NestJS with TypeScript to develop robust, maintainable APIs. Experienced with databases including MySQL, MongoDB, and RDBMS. I focus on writing clean, modular code and delivering efficient solutions. My goal is to grow in a collaborative environment, contribute to impactful projects, and evolve into a senior full stack developer role.

#### Xpperal (Dispatch management)

In this project I have worked as a full stack javascript developer this project is all about dispatching the clothes from large industries using bundles tracks also have to get vehicle details and all we have managed in this project only

92 Days

#### Sustainability

A Sustainability Project is a strategic initiative focused on integrating environmentally responsible practices into various operations, ensuring the long-term health of ecosystems and resources while promoting economic and social well-being.

61 Days

#### Trackx

The TrackX Project focuses on monitoring and managing vehicles after they undergo servicing. Using advanced onboard diagnostic (OBD) meters, it allows real-time tracking of crucial vehicle parameters, such as performance, fuel consumption, and engine health. These diagnostic tools capture data directly from the car's systems, enabling proactive management of the vehicle's condition.
